Vedic astrology free love report

Free Natal Chart Report - Sidereal Zodiac with Whole Sign Houses The following free birth chart tool lists planet signs, house positions, and aspects. This is for the Sidereal Zodiac with whole sign house system and using the Lahiri ayanamsha. This system is not for everyone so that if you are uncertain, you might instead go back to the default system for determining houses, which is Placidus using the Tropical Zodiac (For the default report using the Tropical Zodiac and Placidus houses, return here). Please note that Cafe Astrology uses the Tropical Zodiac by default. The whole sign house systemWith the Whole Signs House system, each house begins at 0 degrees of the sign. For example, if the Ascendant is 4 degrees Leo, then the 1st house begins at 0 degrees Leo, the 2nd house is calculated as 0 degrees Virgo, the 3rd, 0 degrees Libra, and so forth. If you're uncertain, we suggest using the default generator with Placidus houses to start. After studying astrology and experimenting with house systems, you might elect to use Whole Sign, Koch, Campanus, Equal, or others, or continue with Placidus. Many of the major factors are currently interpreted, such as Sun, Moon, Ascendant, Mercury, and Venus in signs and house. More to come, so please check back from time to time! **See instructions/notes below for using this calculator. Some notes about this birth chart calculator: Please be patient when entering your birth city to allow the program to call up the list of locations as sometimes it's not instantaneous. If you're just not getting results and can't submit, it may be that the atlas is busy (GeoNames has certain limits per hour and per day). In this case, you can use this same tool on my sister site, Astrology Cafe here. It's important to enter the city name only or the first several letters of the city in the Birth City field, not the country or state/province/region. For example, if you were born in Fuzhou, Fujian, China, you should enter "fuzhou" or similar and not "fujian" or "china." It's better not to overtype - for best results, type in the CITY name and scroll through the list for the correct city. **Important: Under normal circumstances, you don't need to change the time zone offset. Please don't adjust the time zone offset unless you know for certain what you're doing since the default offsets incorporate crucial factors, such as daylight savings time, and are in the majority of cases accurate. There are discrepancies as with all historical time zone atlases, particularly for birth years before 1970, so if you need help with the time zone offset value, send an email to reports@cafeastrology.com. Be sure to mention why you're writing and include full birth data. If you'd like to save your report to keep for yourself, you might choose the PDF option above. Before generating the PDF, you can adjust the fonts and click to remove parts of the report you don't want to include in your copy--such as this paragraph! Do you prefer the default Tropical Zodiac with the Placidus House system? If so, you can find the default free natal chart report with Placidus houses here. If you prefer the Koch house system, you can use this Natal Chart Report Generator with Koch Houses, or if Equal is your preferred house system, use the Natal Chart Report with Equal Houses calculator. See also Cafe Astrology's Free Reports site, including full interpretations of the natal chart, transits, and compatibility, online since 2002. The interpretations in the birth chart report are written by myself, Annie Heese, and are typically expanded interpretations already found on this site. Karaka of a matter is the significator of the matter. He is the one who causes events related to that matter. There are 3 kinds of karakas: (1) Naisargika karakas (natural significators, 9 in number). (2) Chara karakas (variable significators, 8 in number), and, (3) Sthira karakas (fixed significators, 7 in number). One should not use the three types of karakas in a mixed-up way. Karakas of each type have a specific purpose. One should understand the distinction between chara, sthira and naisargika karakas clearly and use them accordingly. Naisargika karakas shows everything that exists in the creation. They include Rahu, Ketu and the seven planets. They are presided by Brahma. Naisargika karakas show not only human beings, but they show various impersonal things and matters. They show everything that exists in Brahma's creation and affects a person. Naisargika karakas are very useful in phalita Jyotish, i.e. analysis of general results. [/nextpage][nextpage title="Chara karakas"] Chara karakas include Rahu and the seven planets. They do not include Ketu, as Ketu stands for moksha (emancipation) and does not stand for any person who affects one's sustenance. Chara karakas are presided by Vishnu and they show people who play a role in one's life. As Vishnu presides over activities related to sustenance, achievements and spiritual progress, chara karakas show these aspects of one's life. Chara karakas show people who play an important role in one's sustenance and achievements. Examples are - mother, father, wife, advisors etc. Chara karakas are very useful in Raja Yogas and in spiritual progress. They also show how our karma (cumulative sum of actions) is carried from one life to another. Sthira karakas include only 7 planets because only they have physical bodies. They are presided by Shiva. As Shiva presides over death21, they show the destruction of body. Sthira karakas are useful in timing the death of various near relatives. Chara Karakas We use the following procedure to find chara karakas: (1) Take the eight planets - Sun, Moon, Mars, Mercury, Jupiter, Venus, Saturn and Rahu. For each planet, find its advancement from the beginning of the rasi occupied by it. For Rahu, measure the advancement from the end of his rasi. (2) Arrange them in the decreasing order of advancement. (3) The planet with the highest advancement is Atma Karaka (significator of self). We will denote him by AK. Find other chara karakas using Table 13. Table 13: Chara karakas Advancement Order Karaka Symbol Persons shown22 1 Atma Karaka AK Self 2 Amatya Karaka AmK Ministers23 3 Bhratri Karaka BK Siblings Highest 4 Matri Karaka MK Mother 5 Pitri Karaka PK Father 6 Putra Karaka PK Children 7 Jnaati24 Karaka GK (JK) Rivals25 Lowest 8 Dara karaka DK Spouse If two planets have the same degrees, we should compare minutes. If minutes are same, we should compare the seconds. If two planets are exactly at the same longitude, then they will hold a karakatwa (signification) together and the next karakatwa will have no ruler. We should use the corresponding sthira karaka in that case. However, this rarely becomes necessary, as two planets are rarely at exactly the same longitude. [/nextpage][nextpage title="Sthira Karakas"] Sthira Karakas The following is the list of sthira karakas: Sun or Venus (stronger) 26: Father Moon or Mars (stronger): Mother Mars: Younger siblings, brother-in-law and sister-in-law (spouses of siblings) Mercury: Maternal relatives (uncles and aunts) Jupiter: Husband, sons, paternal grandparents and other paternal relatives (uncles and aunts) Venus: Wife, father-in-law, mother-in-law & maternal grandparents Saturn: Elder siblings27 The use of sthira karakas has already been explained. They are presided by Shiva and they are used in the timing of death of the above relatives. They should not be used in general predictive astrology in the place of naisargika karakas. For example, some astrologers use the 7th from Jupiter instead of the 7th from Venus to predict marriage. However, Venus is the natural significator of marriage and the 7th from Venus should be used for predicting marriage, both in male and female charts. When predicting the death of spouse, we use Jupiter in female charts and Venus in male charts.28 Another difference between sthira and naisargika karakas is that sthira karakas themselves represent the physical bodies of the relatives. In the case of naisargika karakas, we must take the relevant house from the karaka. For example, Jupiter represents the physical body of husband in a female chart, for the purpose of timing death. For the purpose of timing marriage, the 7th from Venus (and not Venus himself) shows husband. Chara karakas are also similar to sthira karakas in this aspect. We do not take the 7th from DK for spouse, but DK himself shows spouse. [/nextpage][nextpage title="Naisargika Karakas"] Naisargika Karakas We have seen that chara karakas are used in analyzing the influences of various persons on a native, from the point of view of sustenance, achievements and spiritual evolution. We have seen that sthira karakas are used in analyzing the death of relatives. In addition, we have naisargika karakas, who are the natural significators of various matters. These significations are used in general Phalita Jyotish. Table 15 gives a list of naisargika karakas. For example, the 4th house from Moon shows mother. The 5th house from Jupiter shows sons. If we want to analyze the birth of children or analyze some simple events from their lives, we should take the 5th from Jupiter. If we want to analyze some children-related troubles that punish one's soul or if we want to analyze some achievements and happiness related to children, they will be more closely related to PK (putra karaka of chara karakas). If we want to time the death of a child, sthira karaka for children (Jupiter) should be used. karakas in vedic astrology In addition, we have various other matters allotted to different planets in classics. The list of the natural significations of various planets is listed in Table 16. For example, Mercury and 5th house show memory and so the 5th house from Mercury shows memory. karakas in vedic astrology By P.V.R.
